Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-9 have been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The use of the term "only" in the limitation "the engagement of the protrusion and the groove is canceled only by sliding" is misdescriptive. Clearly, applicant's fastener can be disengaged by pulling the two parts of the faster apart from one another by applying the appropriate force and camming of the elements relative to one another similar to what is shown in Lynch's figures 8a-8d.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5 and 9 have been rejected under 35 U.S.C. 102(b) as being anticipated by Lynch, 5187843. Lynch discloses the claimed invention as shown in the annotated drawings.

Lynch also discloses that the fastening can be disengaged by sliding the groove and the protrusion relative to each other. The bottom of column 7 and the top of column 8 discusses the addition of ridge 390 to prevent the groove and protrusion from sliding apart and disengaging from one another. This makes it absolutely clear that Lynch's device is capable of performing the intended functions.

5. Claims 3-8 have been rejected under 35 U.S.C. 102(b) as being anticipated by Ausnit, 3325084. Ausnit discloses a fastener with a plurality of protrusions and grooves (figures 5-9) on an envelope, box or pouch (col. 1, lines 25-26). Wherein all of the different embodiments of the fastener are capable of performing the intended function of disengagement.
